Re: Cell Phone Use On Aircraft

Please do not allow cell phone use on aircraft. First and foremost, there is the possibility of interference with navigational equipment.

In addition, cell phone use on an aircraft could aid terrorists in communicating with each other both in the air and on the ground. Cell phone use would also require flight attendants to police the use and compromise our ability to maintain a safe and secure environment for all on board. On the more human level, cell phone use would be an added stress on all passengers present and increase the noise volume with loud conversations. Coupled with alcohol consumption, the potential for air rage would be great.
